

## **Principal Operational Technology Consultants**

### **Background to DGA Consulting**

DGA Consulting is a specialist management and operational technology consulting company consisting of talented and experienced professionals who collaborate to solve client challenges in the energy utilities sectors.

With a successful track record and a growing reputation in our market, we are keen to expand our coverage and recruit additional consultants who are able to assist us in the delivery of our services and to grow our client base in the operational technology sphere.

### **Role Requirements**

DGA Consulting wishes to identify suitable candidates for roles as Principal OT Consultants. Successful candidates will be required to perform a broad range of functions within the business including:-

- Consulting services in project design, procurement and implementation
- Provision of specific advice on the best use of operational technology to improve utility operations
- Development of proposals (including technical and commercial aspects)
- Client meetings and sales presentations
- Participation at relevant industry conferences / events

The role will be home-office based and may be located in most Australian major cities. The DGA team is geographically disperse and largely operates utilising remote interactions.

### **Candidate Requirements**

Candidates would ideally have fifteen years of overall experience in the energy utilities sector, and ten years of experience with OT systems and their associated environments.

Key skills and experience required include:

- Degree qualified in Electrical or allied Engineering, and membership in a recognised professional engineering association (such as IEEE, IEAust.)
- Experience in the planning, design, procurement, implementation and operation of OT Systems including:
  - gathering of business requirements,
  - development of technical specifications,
  - development of commercial / contractual tender documentation, and
  - evaluation of tenders and the management of ensuing projects

- Familiarity with energy utility operating practices and standards
- Strong verbal, written and presentation skills
- A willingness to travel interstate and overseas as project assignments may dictate
- Self-starter able to perform with a high level of autonomy

Desirable skills and experience include:

- Existing relationships within the utilities sector
- Solid understanding of cyber-security principles as they relate to real-time systems including familiarity with relevant technologies and design architectures
- An understanding of energy market rules and regulatory conditions

#### **What DGA Consulting can offer**

DGA Consulting has a culture based on working within a collegial environment where collaboration, respect, integrity and high-quality work is valued. We offer the following benefits from working with the company:

- The opportunity to work on challenging projects locally and throughout the world and operate with a high level of independence
- A friendly and enjoyable workplace with family-friendly work practices
- A team-oriented environment where talented people collaborate to achieve the best results for our clients
- Competitive remuneration package

#### **Application Process**
